About Me

I am a passionate developer eager to build scalable web applications and explore end-to-end project deployment on AWS or any cloud service. I enjoy starting projects from scratch, focusing on clean design and efficient solutions. Currently, I am conducting a research project on predicting stock prices using sentiment analysis on Twitter feeds, combining machine learning and financial data. As I continue developing my skills in full-stack development and cloud services, I am excited to contribute to innovative projects and grow in dynamic, collaborative environments. I have also taken cybersecurity as my optional courses, enhancing my understanding of secure system development and protection strategies.

Education

Heriot-Watt University (HWU), Edinburgh, United Kingdom *Sept 2021 – Present*
Bachelor of Science in (Hons) in Computer Science

- Achieved the Deputy Principal Award for Academic Performance in 2022.
- Achieved an 'A' in core modules such as 'Software Engineering', 'Data Communication and Networking' and 'Computer Network Security'
- Presently doing a research project on predicting stock market prices using sentiment analysis on data and sentiment retrieved from tweets.

The Indian High School (IHS), Dubai, United Arab Emirates *Apr 2008 – Mar 2021*
Secondary and High School Education

- Graduated High School (XII) in Business, Accounting, Economics and Computer Science (Grade: 85%)
- Graduated Secondary School (X) in 2019 (Grade: 82%)

Experience

Lab Demonstrator — Teaching Assistant *Heriot-Watt University, Edinburgh* *Jan 2025 – Present*

- Lab demonstrator for Introduction to Computer Systems
- Working alongside student groups in lab tutorials weekly.
- Assisting students with issues and queries regarding the course
- Grading Lab works done by students and giving feedback.

Lab Demonstrator — Teaching Assistant *Heriot-Watt University, Edinburgh* *Sep 2024 – Dec 2024*

- Lab Assistant for Data Communications and Networking Module
- Grading students on networking courseworks and giving remarks on their work immediately
- Assisting students with issues and queries regarding the course

Low Code Intern *Sharaf DG - UAE Head Quarters* *Jun 2023 – Sep 2023*

- Wrote documentation that clearly and concisely described the technical architecture of the application.
- Wrote documentation for end users using the application.
- Supported application development and resolved issues by collaborating with other developers.
- Assisted in troubleshooting and brainstorming new application feature ideas.

Awards

TDRA / UAE Hackathon - Zayed University *Dubai, United Arab Emirates* *Feb 2023 – Mar 2023*

- Designed and pitched a web application for startups and venture capitals - providing company insights from startups to established businesses

- Received extraordinary participation certificate

Deputy Principal Award - Heriot-Watt University *Dubai, United Arab Emirates*

Aug 2022

- Received Deputy Principal Award for achieving an A in at least 6 modules for one year

Projects

GiTrends - Github Trending API

[github](#) 

- Description: GiTrends provides an API for fetching real-time trending GitHub repositories, addressing the lack of an official GitHub trending API. The project includes a Node.js-powered backend that serves the API and a Next.js-based frontend for showcasing the data in a user-friendly interface.

CloudFlare Enhanced - DDOS Protection for small scale websites

[github](#) 

- Description: A Python script for small websites that monitors server CPU usage at fixed intervals to detect anomalies, like high usage potentially from attacks. It automatically creates a custom Cloudflare firewall rule to mitigate attacks using Forced CAPTCHA and disables the rule if CPU usage normalizes after a set time, ensuring efficient protection.

Web Browser Based on C#

[github](#) 

- Affiliation: Heriot-Watt University
- Description: Designed and implemented a web browser using C#, with features like HTTP request handling, history management, favorites, and a simple GUI.

Barcode Scanner - Terminal Based

[github](#) 

- Description: Using python libraries such as opencv, zxing to detect barcodes in real time from the live camera feed and return the product details.

Mergemat - Collaborative Brainstorming Application for students

- Affiliation: Heriot-Watt University
- Description: We as a group developed a collaborative system for students to work with their group mates by giving them functionality to chat with other users directly, create group chats (similar to MS Teams), create collaborative code sheets, whiteboards and file sharing systems.

Weather Application - Web Based

[github](#) 

- Description: Using Django, a python web framework to display weather of the current location and countries all around the world.

Skills

Languages: Python, Java

Technologies: Vim, GNU Nano, AWS, Jupyter, SQL, Git, Linux

Soft Skills: Leadership, Communication and management skills
